## CSR PROJECTS

1	<b>Thematic area</b>	<b>Education</b>
	<b>Project Name</b>	Establishment of Ramanujan IT city - SASTRA Srinivasa Ramanujan Research Chair
	<b>Project objective</b>	To establish TATA-Realty-SASTRA Research Chairs in Discrete Mathematics and Number Theory and mentor and nurture young researchers in these fields.
	<b>Project Brief/background</b>	<p>Due to the integration of computer-aided technology in all disciplines of Science and Engineering, a wide variety of mathematical concepts are being used in designing customized software codes for engineering applications. Taking forward the research outcomes from diverse research teams at SASTRA to crystallize into applications across various emerging domains requires establishment of research chairs who will effectively mentor young researchers in basic and applied segments of these areas.</p> <p>Thus, support was provided to Sastra university to establish Research chairs to work on Discrete Mathematics and Number Theory.</p> <p>This support has helped in consolidating the research activities in mathematics for a diverse range of applications as well as has opened new vistas in research and capacity building in different facets of Data Science.</p>
2	<b>Thematic area</b>	<b>Environment Protection</b>
	<b>Project Name</b>	Water Body Restoration
	<b>Project objective</b>	Project aim at increasing water holding capacity, enhance groundwater recharge and the natural flora and fauna dependent on the water body while largely contributing efforts of conservation of biodiversity.
	<b>Project Brief/background</b>	<p>Ecologically, urban water bodies play key role in balancing the local environment viz; regulating the surplus flood waters during monsoon periods, keeping lake surrounding cool, recharging of ground water sources, nurturing wetland ecosystem and provides feeding &amp; breeding grounds many local and migratory birds. In urban cites like Chennai these water bodies are on their death beds due to encroachment and abandonment for hazardous waste disposal.</p> <p>Thus, to address this issue, a project on waterbody restoration with ecological and scientific approach in Chennai- Rettaikuttai Lake spread in 17 acres has been undertaken. This program aims at benefiting population of around 15000 residing in and around the lake.</p>

## TRIL INFOPARK LIMITED

	<b>Thematic area</b>	<b>Livelihood and skill development</b>
	<b>Project Name</b>	Skill Development Program
	<b>Project objective</b>	To create entry level employment opportunities for marginalized youth with necessary skill sets thus enabling them to reach out to better livelihood opportunities and lead a dignified life.
3	<b>Project Brief/background</b>	The project aims at targeting the young people from marginalized communities in the age group of 18 to 25 years who are either school or college dropouts or youth who need jobs and lack job-readiness skills. Through a 3-month training program, the identified youth will be prepared for entry level jobs where they can earn a respectable income and get better source of livelihood.
